Flex Lite is the light duty alternative to Flex-C Trac. Manufactured in an economical fashion, Flex Lite is the contender when it comes to curved framing applications where lateral loads are not an issue and where the higher quality of Flex-C Trac is not needed. A light weight, easy to use product from a name you know and trust, the champion in the curved framing industry, Flex-Ability Concepts.

Flex Lite

FEATURES
• 25 Gauge material
• G-40 Galvanization
• Pivotal Sections
• Pre-Punched holes in both the flanges and the web plate
• No bumps or ridges
• 20 Sections/10'
• Able to achieve a 15° radius

BENEFITS
• Low cost, rigid enough for many curved interior applications
• Allows track to be easily formed by hand
• Easy installation of sharp point or self tapping screws
• Nothing to interfere with stud placement
• Fewer screws required for securing the shape
• Small radius. More than adequate for most curved framing applications

Flex-C Trac

FEATURES
• 20 Gauge material
• G-40 Galvanization
• Pivotal Sections
• Pre-Punched holes in both the flanges and the web plate
• No bumps or ridges
• 40 Sections/10'
• Able to achieve a 7° radius
• Is ICC Compliant
• Is rated for lateral loads

BENEFITS
• Heavier material makes for a more rigid product
• Allows track to be easily formed by hand
• Easy installation of self tapping screws
• Nothing to interfere with stud placement
• More sections create a smoother curve
• Small radius. Exceptional flexibility for nearly all curved framing applications
• Readily accepted by project engineers, inspectors and specifiers
• Easily evaluated for specific project applications
• Load tables available
